## FAQ's

### How many alerts it includes ?

Service sends new textmessage when there has been one (1) hour pause from last visible auroras or sooner if auroras comes brighter.

### Does it work with my own phonenumber ?

Yes, the service works with your own number. Phonenumber is given in international format, few examples below:

Finland (country code +358): +358 400423173  
France (country code +33): +33 123456789  
Spain (country code +34): +34 12345678  
German(country code +49): +49 1234567890  
Singapore (country code +65): +65 12345678

### Why SMS and email ?

No matter where are you from, **receiving SMS –messages costs nothing for you**. If you are shopping or eating in restaurant you will get SMS Alert when Auroras are visible. When you are in hotel and connected to hotel's Wifi you may read additional Aurora Alert information from your email free of charge.

### What brings you additional costs ?

- making/answering voice call
- **mobile data is switched ON** (this enables internet services through operators network; such as Facebook, Snapchat, Instagram, etc)

### How to switch OFF mobile data

iPhone: Settings -> Mobilenetwork -> OFF

Samsung: Settings -> Mobile Networks -> Mobile data -> OFF

(Note: SMS messages can be received even if the mobile data is switched off )
